

FIFTH SEMESTER SE
ECO-SE-5014
Field Survey: Techniques and Application

Course Description:

This course intends to give the students the basic idea on the techniques of data collection from the field. It also involves them in applying the methods of data collection through field survey on relevant socio-economic topics.

Course Outline:

1. What is field survey? Need for field survey in socio-economic problem analysis
2. Methods of collecting data using field survey: Direct Personal Interview, Focus Group Discussion, Case Studies
3. Students are required to collect data from the field on any socio-economically relevant topic of their choice.

Readings:

1. S P Gupta, *Statistical Methods*, S Chand.
2. P.H. Karmel and M. Polasek (1978), *Applied Statistics for Economists*, 4th edition, Pitman.
